Mark,

I am going through it all today, making sure all photos are accounted for in database.

So far it all looks good.

Thanks

Raj Dutt, GISP

Raj,

Please let me know if you have issue. I want to make sure that you can use the data.

Mark,

Thank you for your help in resolving projection issues this morning. I have started downloading files to server.

I shall contact you if something pops up; although I don't expect it.

Thanks again.

Subject: 1900 -- ASPECT Update Final -- 12 August 2015

Final processed ASPECT data is being uploaded at this time. Flight 10 data has been divided into UTM 12 and UTM 13. It is estimated that all data will be up loaded by 1930 MDT.

Review of the data showed no observable color in the San Juan (other than brown water). Imagery north of Farmington along the Animas shows very isolated areas of red color. Areas north of Durango show more color especially in the braided stream zone north of Durango.

ASPECT has demobed the area and is expected to be back on standby in Dallas by 2030 MDT.

If you have any questions please let me know.

Thanks to everyone.
